Key Areas of Experience & Competence

- Project Management
- Computer Engineering
- Machine Learning/AI
- STEMI Facilitator
- Budgeting
- Report Writing
- Web development
- Microsoft Office Packages

Work Experience

- **Organization:** Lantop Infotech April 2022 – June 2022
Position: Intern

Responsibilities:

- Learning and applying Machine Learning techniques.
- Exploring Computer Vision technologies.
- Developing proficiency in web development.
- Creating interactive and user-friendly web applications.
- Engaging in real-world projects and hands-on experience.
- Collaborating with teams on cutting-edge solutions.
- Enhancing skills in data analysis and algorithm implementation.
- Gaining experience in software development.

- **Organization:** Opolo Global Innovation June 2022 - Till date.
Position: STEMI Facilitator.

Responsibilities:

- Responsible for coordinating and overseeing training/workshop activities.
- Serve as a mentor and trainer for students and participants in the STEMI program.
- Building partnerships and collaborating with educational institutions, industry professionals and other organizations in the STEM field.
- Regularly evaluating their performance and providing constructive feedback.
- Promoting STEMI program and attracting potential participants.

- **Organization:** Opolo Global Innovation Part time.
Position: Data Entry Officer

Responsibilities:

- Efficiently and accurately input large volumes of data into the company's database systems.
- Review, verify, and correct data discrepancies and inconsistencies.
- Collaborate with team members to ensure data quality and consistency across all projects.
- Perform routine data maintenance tasks, including data archiving and retrieval.
- Maintain confidentiality and data security protocols to protect sensitive information.

- Collaborate with other departments to gather data requirements and ensure data entry meets business needs.

- **Organization:** Yempet Global Ventures
Position: Assistant Computer Engineer

June 2019 – December 2019

Responsibilities:

- Providing technical support to employees and clients in the company which involves troubleshooting hardware and software issues and diagnosing problems.
- Assisting in installation and configuration of computer hardware and software.
- Performing regular maintenance tasks on computer systems to ensure their optimal performance.
- Assisting with the setup and maintenance of the company's computer network.
- Maintaining accurate records and documentation related to computer systems, repairs and maintenance.
- Contributing to the overall efficiency and functionality of the company's computer infrastructure.

- **Organization:** Nigeria Association of Computing Students (NACOS)-October 2022 - September 2023
Position: President

Responsibilities:

- Providing effective leadership and strategic direction to the association which involves setting goals and objectives for the organization.
- Overseeing the day-to-day operations of the association and ensuring that all activities and events are well coordinated.
- Representing the interests of computing students at the national level.
- Advocating for the needs and concerns of computing students.
- Organizing workshops, seminars and conferences that promote the professional development of computing students.
- Building and maintaining relationships with other student organizations, computing societies and industry professionals.

- **Organization:** SIGMA VISCERAL ENT.
Position: Project Manager (Remote)

March 2023 - Till date

Responsibilities:

- Developing comprehensive project plans that outline the project scope, objectives, deliverables, timeline, and resource requirements.
- Responsible for driving projects from inception to completion, ensuring that they are delivered on time, within budget, and to the satisfaction of stakeholders.
- Overseeing the successful execution of projects, ensuring that they are completed within the defined parameters.
- Ensuring that projects meet the required quality standards.
- Harnessing the level of communication among the stakeholders involved in the project.

Education & Qualifications

- | | | |
|---|--------------------------|------|
| • Osun State University
B.Sc. Computer Science | Second Class Upper Honor | 2023 |
|---|--------------------------|------|

Research Experience.

Research Assistant

- An extensive comparative analysis of machine learning algorithms for intrusion detection system, report writing, manuscript.
- Deliver a seminar to final year students on the rudiments of research.

Skills & Attributes

- An expert in working with python programming language for delivering an effective machine learning algorithm and also a python framework (Flask) for back end development.
- Well skilled in operating computer software that are required for calculating, collating and documenting of data, such as Microsoft Word, Excel and PowerPoint.
- Proven record of results working on machine learning projects and successfully deploying it on a web app.
- Talented in dealing with multiple assignments both physically and virtually with the ability to meet deadlines and complete accurate work at all times.
- Highly capable in writing and giving reports when discussing issues with staff members or delivering correspondence to individuals in writing.
- Highly disciplined and capable of leading a team to deliver the best to an organization.
